COURSES

Software Engineering: Modeling Software Systems using UML, *The Hong Kong University of Science and Technology*
2023 | coursera

Android Development Track,
One Million Arab Coders Initiative
2021 | Dubai

PROJECTS

AllNewsMR, *A project I worked on in order to publish news from Mauritanian news sites in real time. The first time I developed it was in 2021, it publishes the news on a Facebook page, and publishes a picture of the news article with it and its details… I worked on it alone, I was the one who developed it completely.*
2021

ZakatOnCamels, *A web application that calculates zakat on camels, and allows sperm to calculate their due zakat. I built it for the first time in 2021,*
2021

SiteApplicationAPI, *A system built with Nodejs that webscraps websites and pulls articles and their texts. I developed it on my own and it has an Android application linked to it*
2022

5C API & UI, *A website similar to mauribac.com, which calculates the grades of students in my personal school in 2023, that I personally developed.*
2023

6C-Class API&UI, *a website for get results of 6c class, show average's students*
2024

6C - Dashboard,
control 6c's site by pretty ui design
2024

E-commerce site, *The simple basis is based on an initial store that displays the product and purchases directly from within the site under the supervision of the Visa or MasterCard industry, and payment supported by Stripe and secure*
2024

Shortly-Link, *Quickly and easily shorten your links to create sleek, short link system.*
2024
